

Dear Families,

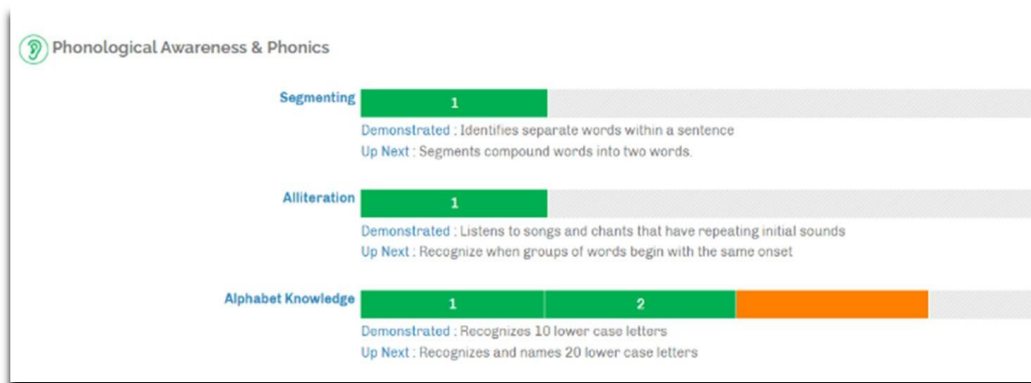

Your child's school knows the value of technology for young learners, and to ensure learning is the best it can be, your child's school has chosen Ignite by Hatch™!

Ignite by Hatch™ is a comprehensive digital learning platform that engages, assesses, and instructs children between the ages of 3 and 6. As your child engages with play-based learning experiences delivered through technology Ignite shares real-time data with Insights, a reporting platform that provides teachers, administrators, and families with real time data and instructional supports.

Families have unique logins that enable access to the Parent Dashboard within Insights. Access to the Parent Dashboards provides access to specific details about your child and Ignite!

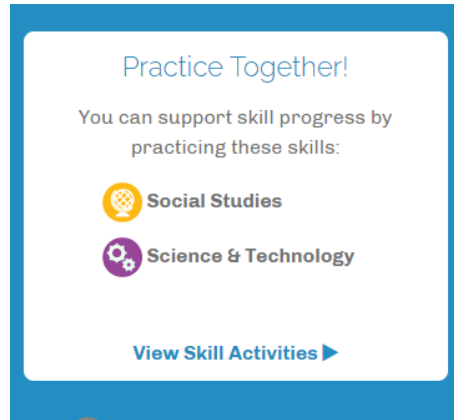

Upon selecting "View Detailed Progress," you will see a report that details your child's development through the Ignite learning skills.

In addition, "Practice Together" provides access to family-friendly learning experiences that can be completed at home to support skill development. Select "View Skill Activities" to find the Family Connection Experiences.

And, last, but certainly not least, the Parent Dashboard enables you to see your "Child's Gallery"! The gallery includes all the drawing and writing experiences your child has created within the Ignite Digital Platform.

We know families play a critical role in their child's development and we appreciate your dedication to excellence! Please contact your child's teacher if you have questions about how to access the Insights Parent Dashboard, or anything pertaining to Ignite by Hatch™!
